ARBIS Tokenomics

Total Supply:

50,000,000,000 ARBIS (total number of burgers eaten by Americans per year)

Circulating Supply:

5% of ARBIS supply will be circulating at launch.

5,000,000,000 – 10%

- 2,500,000,000 – 5% airdropped to NYAN Strategy depositors
- 2,000,000,000 – 4% airdropped to NYAN-ETH Strategy depositors
- 500,000,000 – 1% airdropped to NYAN Strategy compounders

Non-Circulating Supply:

95% of ARBIS supply will be non-circulating at launch.

47,500,000,000 ARBIS

- Liquidity Mining: 32,500,000,000 – 65%
    - Liquidity mining programs will be active for 8 weeks following the initial airdrop.
- Team (Vested): 5,000,000,000 – 10%
    - Team funds will be vested linearly with a drip unlock during the 8-week liquidity mining campaign.
- Treasury (Held in public Gnosis Safe): 10,000,000,000 – 15%
    - The treasury fund will be used for deploying new contracts, ecosystem development, future protocol incentives, and protocol upkeep. Our treasury fund will always be transparently viewable and secured by a Gnosis Safe multi-signature contract.

Initial Distribution Chart

Liquidity Mining Program #1

The first liquidity mining program will span for approximately 1 week following the airdrop. 4,062,500,000 tokens (12.5% of the liquidity mining fund) will be distributed during this program, allocations shown below.

Pool 1's will receive 75% of the allocated tokens, split equally.

- NYAN-ETH SLP
- NYAN Single Stake
- WETH-USDC SLP
- WETH-LINK SLP
- WETH-SUSHI SLP
- WBTC-WETH SLP
- WETH-USDC SLP

Pool 2's will receive 15% of the allocated tokens, split as follows.

- ARBIS-ETH SLP – 10%
- ARBIS-NYAN SLP – 5%

Pool 3 will receive 10% of the allocated tokens.

- ARBIS Single Stake

Utility of ARBIS token

Initially, the ARBIS token will be used to bootstrap liquidity in the Arbi's Finance platform through a liquidity mining incentive program which rewards platform users in ARBIS.

The Arbi's Finance protocol collects fees from each of its vaults and products. Eventually, these fees will be partially distributed to those who single-stake ARBIS within the platform.
